

Assignment: Techie Contractor!

A building contractor got a contract from a company to construct Buildings for commercial types as well as residential types, like Hostels, Shopping malls, Offices, Apartments etc.

After completing the construction he wants to sell them. For the same he wants an application that displays all the specifications (i.e. no. of rooms in a flat, about offices, malls etc.) of his buildings.

If a customer comes then he will show him the application.

Criteria

It is of two types:

Commercial type:-- Offices, Shopping Mall

Residential types:-- Apartments, Hostels

Please give all basic structures for the building and make this attractive, so that Customer will like it.
