Java Basics: Michael and Bruce, Who wins the race ?

Michael and Bruce are friends. Both of them liked the same girl.
One day they started fighting over her and decided that both of them
will write a number on a chit. The one whose number will be smaller
will forget the girl and get out of other's way.
The problem was that they were not educated and hence they are still
waiting for someone, who could help them to implement the plan.

Now try to implement a program which can help them, using the above
strategy.
